Polynt Group

After the merger with Reichhold on May 2017 the new Polynt-Reichhold Group is a global Company in the Intermediates, Coating and Composite Resins, Thermoset Compounds, Gel-coats and niche Specialties.

This combination enhances the Group's leading position as a global vertically integrated specialty chemicals player, with significant global presence in Europe, North America and Asia, a strategy initiated by Polynt with the successful integration of PCCR and CCP in the last years and now further reinforced by Reichhold's global scale, extensive product portfolio and R&D competencies.

Polynt-Reichhold Group is known for its superior quality and impressive range of products and with its excellent distribution network it can provide first-class service to customers whatever their market.

Customer Service and Technical Service teams are renowned for their customer focus, offering the best service even after products have left manufacturing.

The Group strives to keep customers satisfied, assisting them in producing premium quality products every time they use its products.

Product innovation is important for the Group's business and it's the reason for which it constantly works with customers to find solutions to problems.

Introducing new or improved products ensures that Polynt-Reichhold Group continue not only to deliver what the market wants and needs, but also when it is wanted and needed.

In April 2024, Polynt Group acquired Polyprocess, a leading supplier of specialty gelcoats, color pastes and derivatives for the composites industry.

European Premium Gel Coats – Fusion™ 9600

Fusion Panels

Gel coats are often the exterior coating for composites parts. Functionally, gelcoats protect the part from weathering, moisture, and chemical exposure. Cosmetically, gelcoats provide smoothness and essentially, colour to the part.

Fusion® Gelcoats is one of the latest offerings from Polynt Composites adding to its vast range of **premium products**.

About these gelcoats

**ARE FORMULATED
WITH HIGH QUALITY
ISO NPG TECHNOLOGY**

**PROVIDE
EXCEPTIONAL
COSMETICS**

**PROVIDE EXCELLENT
UV, WATER AND
CHEMICAL RESISTANCE**

Ideally suited for rich bold colours, Fusion® offers market leading surface finished with high gloss and incredible depth of image.

Long term the surface demonstrates Excellent UV resistance with long term gloss resistance, reduced yellowing, high colour stability and reduced chalking.

Equally the excellent water resistance and low water absorption leads to superior blister resistance, but ultimately superior blush resistance and high chlorine resistance over common premium products.

This leads us to believe the fusion technology offers ***outstanding performance*** within marine, Architectural and long-term water contact environments.

100 HOUR BOIL TEST

A limited range is readily available demonstrated within this brochure. Some colour match options may also be ***accommodated upon request.***
